TikaSathi User Manual

Version 1.0 · October 2026

How to use this manual. Each section is one task. Find the task you want in the contents, then follow the numbered steps. Words in **bold** are the exact words you will see on the screen.

The examples use a made-up family: **Sita Sharma** (caregiver), her daughter **Asha** and her son **Ram**.

About TikaSathi

TikaSathi helps caregivers keep track of their child's vaccines (tika).

It can:

- show which vaccines each child needs, and when;
- remind you before and after each due date;
- keep a record of every vaccine your child has had;
- teach you about vaccines in simple words.

Works offline. The app does not need the internet. Everything is saved on your phone only.

Read aloud. Most screens have a speaker button at the top. Tap it to hear the screen read out. Tap it again to stop.

> **Tip** Read aloud uses your phone's own voice. If nothing is heard, turn up the volume and check your phone's text-to-speech settings.

1. Set up the app for the first time

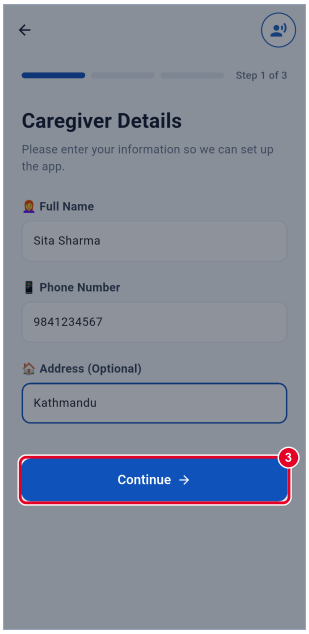

WHAT IT'S FOR

The first time you open TikaSathi, it asks a few questions so it can build your child's vaccine schedule.

WHERE

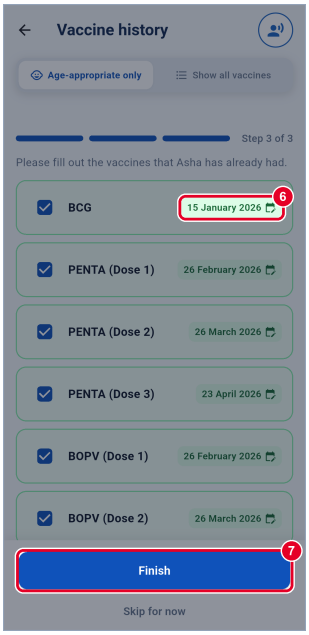

Opens by itself the first time.

1. The phone asks to allow notifications. Tap **Allow** (see section 6).
2. On **Welcome!**, choose **English** or **Nepali**, then tap **Continue**. The app starts in Nepali until you choose.
3. On **Caregiver Details**, enter your **Full Name** and **Phone Number**. Address is optional. Tap **Continue**.

Caregiver Details filled in for Sita Sharma, with Continue boxed

4. Enter your **Child's name**, **Date of Birth** (DD / MM / YYYY) and **Gender**.
5. Tap **Continue**.
6. On **Vaccine history**, tick each vaccine your child has **already had**. Tap the date next to a vaccine to change the date it was given.
7. Tap **Finish**. Your child now appears on the Home screen.

Vaccine history during setup, with a date and Finish boxed

> **Tip** Don't have the vaccination card with you? Tap **Skip for now**. Asha will show as **Awaiting setup completion** until you finish. See section 2.

> **Warning** The date of birth sets the whole schedule. Check it against the child's card.

2. Read the Home screen

WHAT IT'S FOR

The Home screen shows every child, sorted by how urgent their next vaccine is.

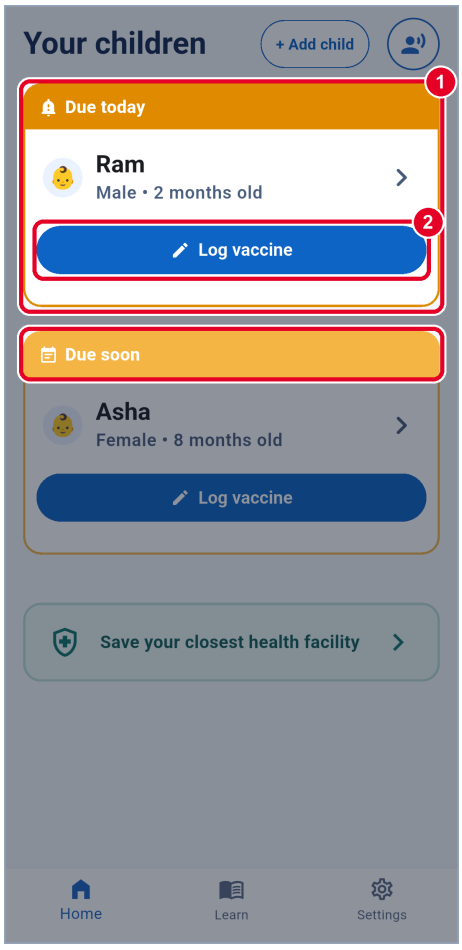

WHERE

Home (bottom bar).

Heading	What it means	What to do
Overdue	A vaccine's due date has passed (from the next day) and it is not recorded.	Visit your health facility.
Due today	A vaccine is due today.	Go for the vaccine today.
Due soon	A vaccine is due in the next 14 days.	Plan your visit.
Up to date	Nothing due in the next 14 days.	Nothing to do.
Awaiting setup completion	Past vaccines haven't been entered yet.	Tap **Complete setup**.

Each child appears under one heading:

1. Tap a child's card to open their page.
2. Tap **Log vaccine** on the card to record a vaccine (section 4).

Home screen with Ram under Due today and Asha under Due soon

3. Add another child

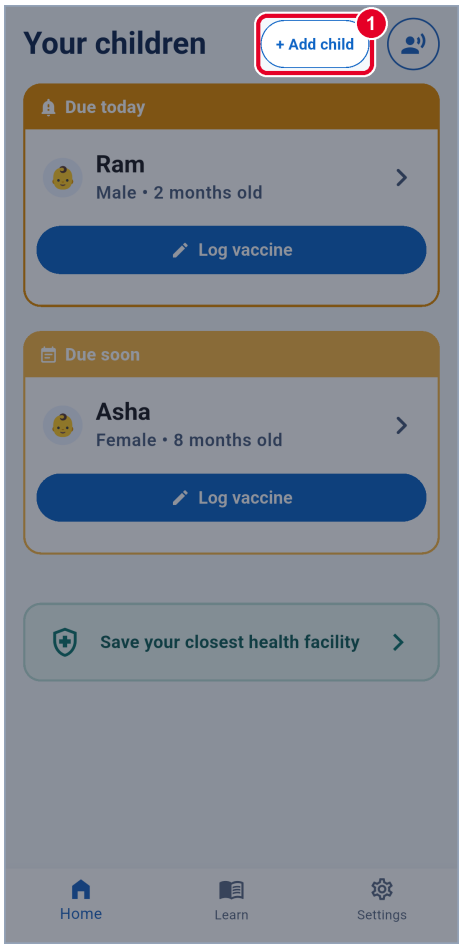

WHAT IT'S FOR

Track more than one child in the same app.

WHERE

Home → **+ Add child**

1. On the Home screen, tap **+ Add child**.
2. On **Add a new child**, enter the child's name, date of birth and gender.
3. Tap **Save child**.
4. On **Vaccine history**, tick the vaccines the child has already had, then tap **Finish** (or **Skip for now**).

Home screen with the + Add child button boxed

4. Record a vaccine your child was given

WHAT IT'S FOR

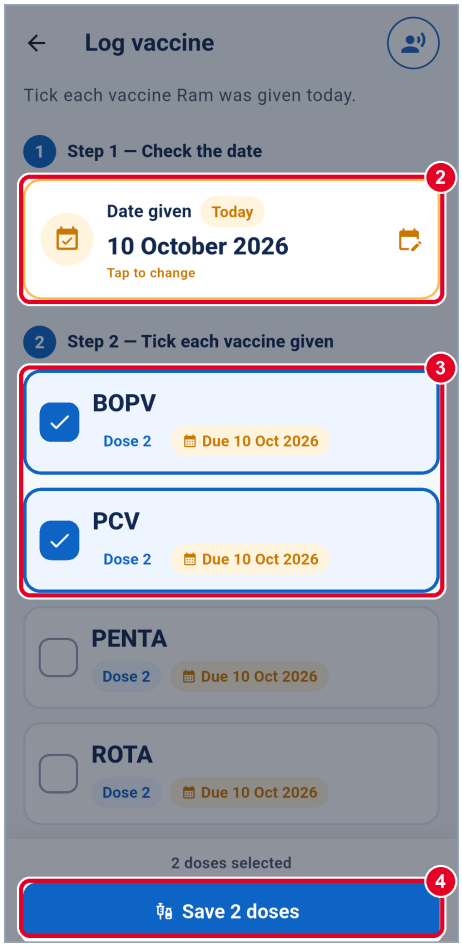

Tell the app a vaccine was given, so it stops reminding you and moves to the next one.

WHERE

Home → child card → **Log vaccine**

1. On the Home screen, tap **Log vaccine** on your child's card.
2. **Step 1:** Check the date. It shows **Today**. If the vaccine was given on another day, tap the date (**Tap to change**).
3. **Step 2:** Tick each vaccine your child was given.
4. Tap **Save** (the button shows how many doses, for example **Save 2 doses**).

> **Tip** The list shows vaccines that are overdue or due today. If there are none, it shows vaccines due in the next 14 days. Tap **Show more vaccines** to see the rest.

Log vaccine screen with two vaccines ticked, the date and Save 2 doses boxed

5. See the schedule and history, and fix a date

WHAT IT'S FOR

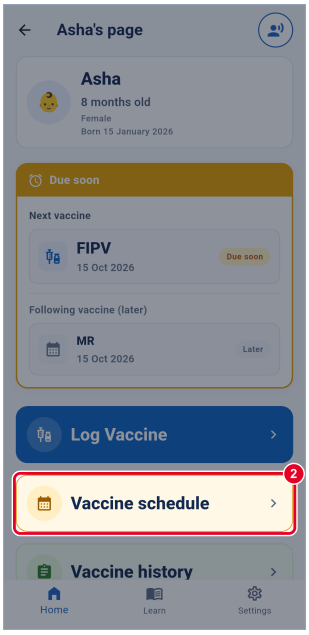

See what's coming next, check what has been given, and fix a wrong date.

WHERE

Home → tap the child → child's page

See upcoming vaccines

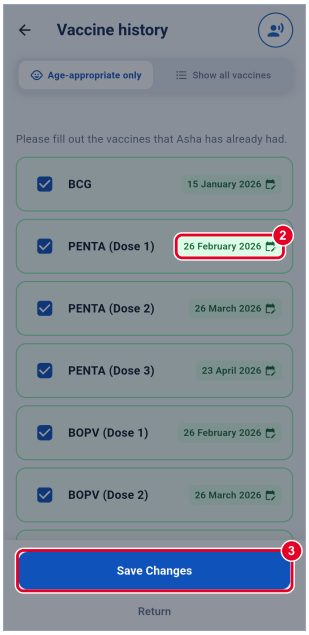

1. Tap your child's card on the Home screen.
2. Tap **Vaccine schedule**. Ticked vaccines have been given. The **Today** line separates past vaccines from upcoming ones.

Asha's page with Vaccine schedule boxed

See or fix past vaccines

1. On your child's page, tap **Vaccine history**.
2. Tap a vaccine's date to change it, or tick a vaccine that is missing.
3. Tap **Save Changes**. Tap **Return** to leave without saving.

Vaccine history screen with a date and Save Changes boxed

> **Tip** **Age-appropriate only** shows vaccines your child is already old enough to have had. Tap **Show all vaccines** to see every one.

> **Warning** If a vaccine was missed, the app shows **Missed Vaccines: Visit health facility for missed vaccines.** Tap **OK**.

6. Vaccine reminders

WHAT IT'S FOR

The app reminds you so you don't miss a vaccine. You don't need to set anything up.

WHERE

Your phone's notifications. Reminders arrive at 9am.

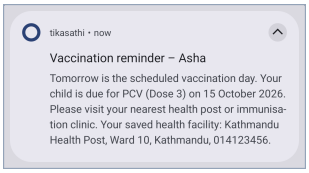

When	Title	What it says
1 week before	**Vaccination reminder**	Which vaccine is due, and the date.
1 day before	**Vaccination reminder**	Tomorrow is the vaccination day.
On the day	**Vaccination reminder**	Today is the vaccination day.
1 day after (not recorded)	**Vaccination missed**	The vaccine has not been recorded yet. Visit your health post.
1 week after (not recorded)	**Vaccination missed**	Missed for a week. Contact your health facility about catch-up.
Then every 2 weeks	**Vaccination overdue**	Contact your health facility for catch-up.

Each title ends with the child's name, for example **Vaccination reminder – Asha**.

If you saved a health facility (section 7), its name appears in the reminder. If you change the language or the facility, reminders that are already waiting update too.

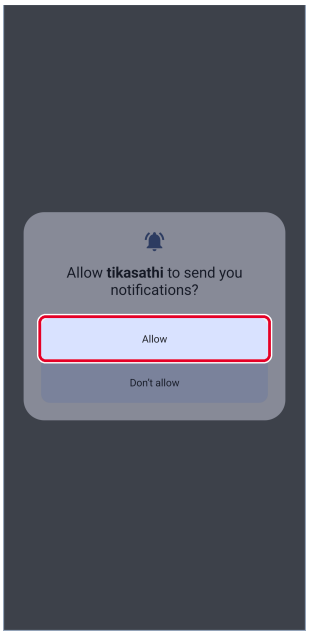

Tap a reminder to open that child's page.

Reminders stop once you record the vaccine (section 4).

A reminder notification for Asha

> **Warning** The first time you open the app, the phone asks to allow notifications. Tap **Allow**. Without it, no reminders can appear.

Phone asking to allow notifications, with Allow boxed

7. Save your health facility

WHAT IT'S FOR

Keep the name, address and phone number of your closest clinic in the app.

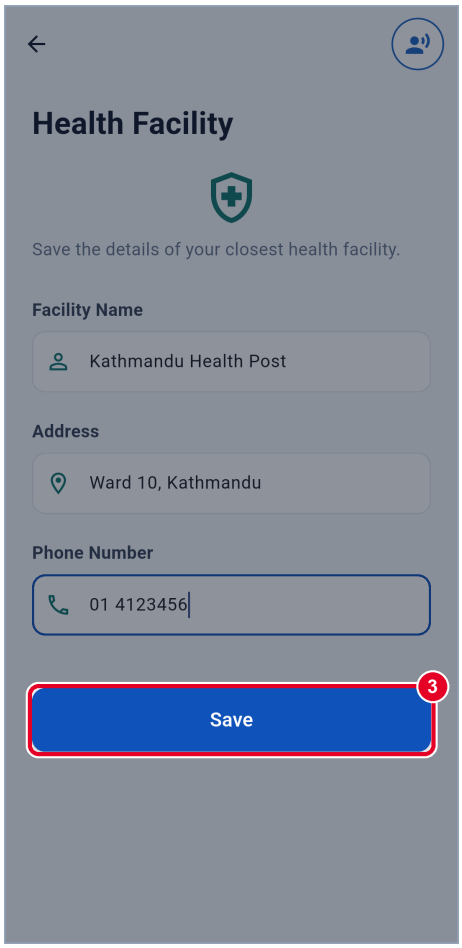

WHERE

Home → **Save your closest health facility**

1. On the Home screen, tap **Save your closest health facility**.
2. Enter the **Facility Name**, **Address** and **Phone Number**.
3. Tap **Save**.

The card on the Home screen now shows **Your local health facility** with the name, address and phone number. Tap the card to change them.

> **Tip** Phone numbers can only contain digits, spaces and a **+** at the start. Other characters are ignored as you type. Spaces are removed when you save.

Health Facility form filled in, with Save boxed

8. Learn about vaccines

WHAT IT'S FOR

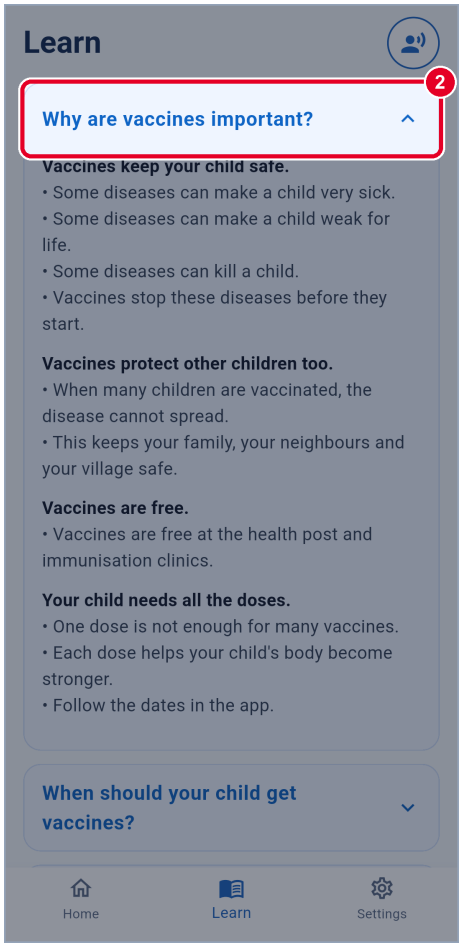

Short, simple answers to common questions about vaccines.

WHERE

Learn (bottom bar)

1. Tap **Learn** in the bottom bar.
2. Tap a question to open it. Tap it again to close it.
3. Tap the speaker button to hear a short introduction to the page. The answers themselves are not read aloud.

Topics include: why vaccines matter, when to get them, what to do if one is missed, whether they are safe, what is normal afterwards, myths and facts, and keeping the vaccination card safe.

Learn page with the first question open

9. Change the language

WHAT IT'S FOR

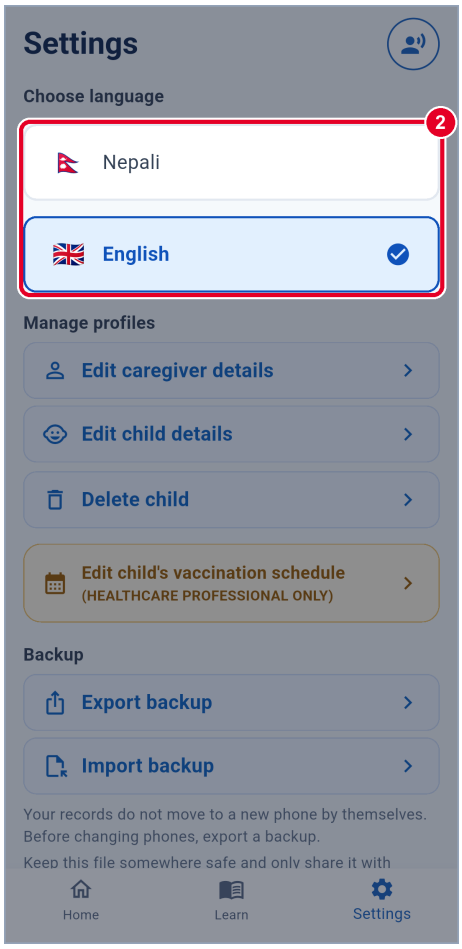

Switch the whole app between English and Nepali.

WHERE

Settings → Choose language

1. Tap **Settings** in the bottom bar.
2. Under **Choose language**, tap **English** or **Nepali**.

The app changes straight away.

Settings with Choose language boxed

10. Change or delete details

WHAT IT'S FOR
Fix a typing mistake, or remove a child.

WHERE
Settings → Manage profiles

Edit your details

1. Tap **Settings**, then **Edit caregiver details**.
2. Change what you need, then tap **Save**.

Edit a child's details

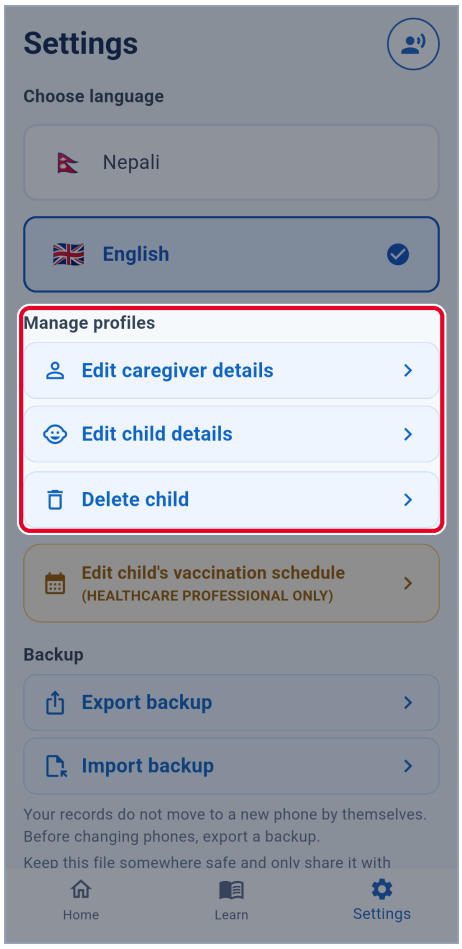

1. Tap **Settings**, then **Edit child details**.
2. Choose the child.
3. Change what you need, then tap **Save**.

> **Warning** Changing the date of birth or gender may change the vaccine schedule. The app asks you to confirm.

Delete a child

1. Tap **Settings**, then **Delete child**.
2. Choose the child.
3. Tap **Delete child** to confirm.

> **Warning** This deletes the child and all their vaccine records. It cannot be undone.

Settings with Manage profiles boxed

11. Back up and restore your data

WHAT IT'S FOR

Your records stay on this phone only. A backup file lets you move them to a new phone, or get them back if something goes wrong.

WHERE

Settings → Backup

Make a backup

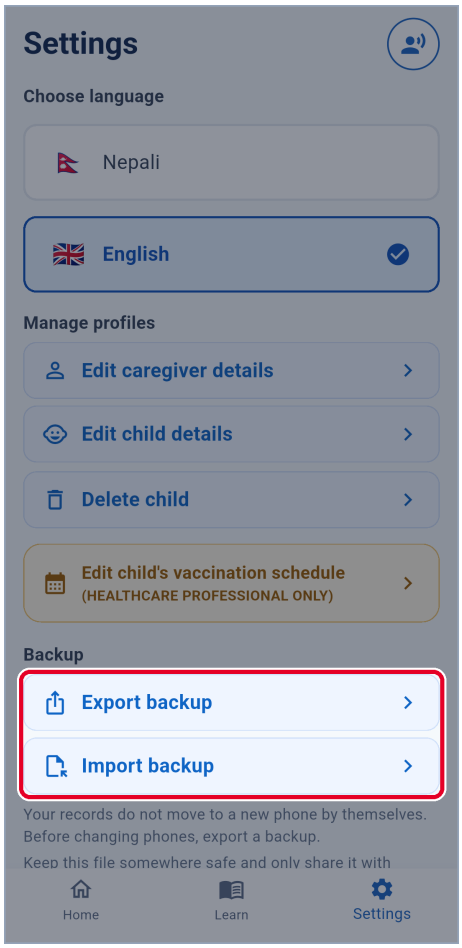

1. Tap **Settings**, then **Export backup**.
2. Choose where to save or send the file (for example, Google Drive or a message to yourself).

Restore a backup

1. On the new phone, install TikaSathi and open it. Finish setup first (you can tap **Skip for now** on **Vaccine history**). Settings only opens after setup.
2. Tap **Settings**, then **Import backup**.
3. Choose the backup file.
4. Tap **Continue** to replace the data on this phone.

> **Warning** The backup file contains your child's health information. Only share it with people you trust.

> **Warning** Importing replaces **all** data on this phone.

Backup section in Settings with Export backup and Import backup boxed

12. Troubleshooting

Problem	What to do
No reminders appear	Check that notifications are allowed for TikaSathi in your phone settings. Check the vaccine isn't already recorded.
Read aloud is silent	Turn up the volume. Check your phone's text-to-speech settings.
A vaccine date is wrong	Fix it in **Vaccine history** (section 5).
The schedule looks wrong	Check the date of birth (section 10). Ask a health worker to check the schedule (For health workers).
"Your saved data cannot be opened"	The phone's security key was reset. If you have a backup, tap **Start fresh**, then import it (section 11).
New phone, no records	Records don't move by themselves. Import a backup (section 11).

For health workers: Edit a child's vaccine schedule

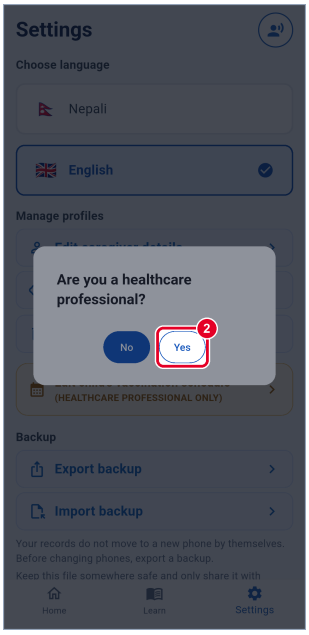

WHAT IT'S FOR

A health worker can change a scheduled date or remove a vaccine, for example after a catch-up plan.

WHERE

Settings → Edit child's vaccination schedule (HEALTHCARE PROFESSIONAL ONLY)

1. Tap **Settings**, then **Edit child's vaccination schedule (HEALTHCARE PROFESSIONAL ONLY)**.
2. When asked **Are you a healthcare professional?**, tap **Yes**.

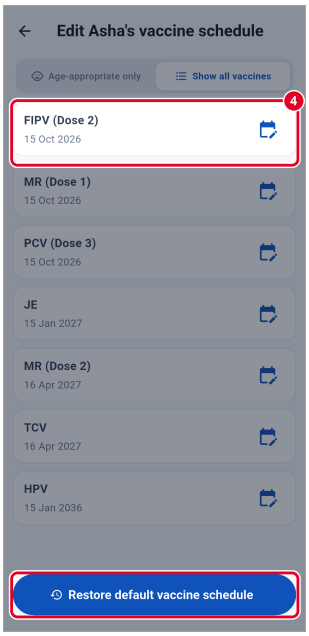

Are you a healthcare professional? with Yes boxed

3. Under **Select a child**, choose the child.
4. Tap a vaccine. **Age-appropriate only** lists vaccines that are overdue, due today or due in the next 14 days. Tap **Show all vaccines** to see the rest.
5. In **Edit scheduled vaccine**, tap the date to change it and tap **Save**. Or tap **Remove from schedule**.
6. Tap **Save schedule changes**, then confirm.

To undo all changes, tap **Restore default vaccine schedule**. This does not change the vaccine history.

> **Warning** Caregivers should not use this. It changes when reminders arrive.

Edit vaccine schedule screen with a vaccine and Restore default vaccine schedule boxed
